

CLAIMS:

1. A set of crayons each having a respective physical property, each crayon having an identifying termination remote from a distal marking end, and
a sound emitting device adapted to cooperate with said identifying termination and to generate an audible message corresponding to a physical property of the associated crayon.
2. A set of crayons according to Claim 1 in which each crayon is coupled to a respective sound emitting device.
3. A set of crayons according to Claim 1 in which there is a single universal sound emitting device for coupling to the crayons.
4. A set of crayons according to Claim 1 in which there is a single universal sound emitting device which is operational to generate an audible message when remote from the associated crayon.
